RURAL DISTRICT OF BLABY

ANNUAL REPORT

of the

MEDICAL OFFICER OF HEALTH

ANDREW C. ROSS, M.B., Ch.B., D.P.H.

together with the

ANNUAL REPORT

of the

CHIEF PUBLIC HEALTH INSPECTOR

JOHN J. GALSWORTHY, F.A.P.H.I., M.R.S.H.

for the

YEAR 1961

BLABY RURAL DISTRICT COUNCIL

Public Health Committee
(As Appointed May 1961)

Mr. K.A. Dalton - Chairman
Mrs. D.K. Pope - Vice-Chairman

Miss F.F. Baldock	Mr. T.F. Leavesley
Mrs. B.L. Bown	Mr. G.H. Marriott
Mrs. M. Wells	Mr. J.M. Moore
Mr. J.W. Atkins (deceased)	Mr. A.J. Orton
Mr. J.H. Bent	Mr. Harold Wells
Mr. A.R. Bottrill	Mr. Horace Wells
Mr. S.L. Callington	Mr. L. Wells
Mr. A.W. Capers	Mr. G.E. White
Mr. A.G. Cosby	Mr. T.F. Wildman
Mr. A.E. Dalby	Mr. H. Yates
Mr. J.W. Herrick	

Mr. D.J. Holt - Chairman of the Council (1961-62)

Public Health Department

Officers and Staff

Medical Officer of Health:

Andrew C. Ross, M.B., Ch.B., D.P.H.

Chief Public Health Inspector:

John J. Galsworthy, F.A.P.H.I., M.R.S.H.

Additional Public Health Inspectors:

A.J. Slipp, M.A.P.H.I. (Senior Assistant)

R.R. Blaylock, M.A.P.H.I.

P.J. Henze, M.R.S.H., M.A.P.H.I.

Secretary:

Miss J. Mills

Shorthand Typist:

Miss L. Woolley

Junior Clerk:

Miss J. Town (appointed 13.9.61)

General Assistant and
Rodent Operator:

G.E. Hunt (resigned 10.4.62.)
R.C. Liggins (appointed 14.5.62.)

To the Chairman and Members of
Blaby Rural District Council.

Mr. Chairman, Ladies and Gentlemen,

I again have the pleasure of presenting the Annual Report on the Health of the District for the year 1961.

The report is divided into three principal parts.

1. Vital Statistics
2. Incidence of Infectious Diseases
3. Immunisation and Vaccination Statistics.

The Infant Mortality Rate of 13.4 per 1,000 live births is the lowest figure ever recorded in this area. This compares with a figure of 21.4 for England and Wales.

There was a high incidence of measles, the number of cases being over twice the number in 1960.

Two cases of poliomyelitis were notified.

In conclusion I should like to thank Mr. Galsworthy, our Chief Public Health Inspector, and all the staff of the Public Health Department for their assistance during the year. I would also wish to express my indebtedness to the Public Health Committee for their help.

I am Mr. Chairman, Ladies and Gentlemen,

Yours obediently,

Andrew C. P.

Medical Officer of Health.

Blaby Rural District

Summary of Principal Statistics for Years 1956-1961

	<u>1956</u>	<u>1957</u>	<u>1958</u>	<u>1959</u>	<u>1960</u>	<u>1961</u>
Population	41,200	42,640	44,720	47,290	50,800	56,650
Birth Rate (a)	14.3	17.3	17.5	20.7	22.0	22.2
Still Birth Rate (b)	10.2	14.0	26.0	18.0	18.4	20.1
Infant Mortality Rate (c)	25.0	15.7	19.1	21.3	16.1	13.4
Neonatal Mortality Rate (c)	21.6	10.3	15.3	16.2	9.8	11.0
Crude Death Rate (a)	10.7	11.8	11.8	10.8	10.6	11.4
Tuberculosis Death Rate (a)	5.12	4.09	5.11	.06	.01	0

(a) per thousand population

(b) per thousand total births

(c) per thousand live births

VITAL STATISTICS

BIRTHS

Live Births

	Males	Females	Total
Legitimate	644	591	1,235
Illegitimate	17	11	28
Totals	661	602	1,263

BIRTH RATE

22.2 per 1,000 estimated population

1940	1941	1942	1943	1944	1945	1946	1947	1948	1949	1950
15.8	13.9	17.1	20.2	20.6	16.4	19.3	19.4	17.2	16.7	14.9

1951	1952	1953	1954	1955	1956	1957	1958	1959	1960	1961
14.8	14.3	13.5	13.0	14.9	14.3	17.3	17.5	20.7	22.0	22.2

The Birth Rate of 22.2 per 1,000 population is the highest figure recorded. There were 1,263 live births against the corresponding figure of 1,118 in 1960.

The live Birth Rate for England and Wales in 1961 per 1,000 population was 17.4. This was the highest since 1948 for England and Wales.

DEATHS

	Males	Females	Total
Deaths from all causes	306	341	647

CRUDE DEATH RATE

11.4 per 1,000 estimated population

1940	1941	1942	1943	1944	1945	1946	1947	1948	1949	1950
10.2	9.2	8.9	10.6	9.9	9.5	10.9	10.2	9.2	9.9	9.5

1951	1952	1953	1954	1955	1956	1957	1958	1959	1960	1961
10.0	8.5	10.6	10.9	12.8	10.7	11.8	11.8	10.8	10.6	11.4

The Crude Death Rate for England and Wales was 12.0 per 1,000 of home population.

The commonest causes of death were:-

	1959	1960	1961
1) Cancer 	80	79	110
2) Diseases of the heart and circulation 	184	221	228
3) Vascular lesions of the nervous system 	80	96	103

There were 16 people killed in road accidents in this area in 1961. Nine deaths occurred between the ages of 2 to 26 years of age.

There were no deaths from pregnancy.

CANCER MORTALITY RATE

The figure for the year is 1.9 per 1,000 population. There were 110 deaths from cancer in a population of 56,650. Cancer of the bronchus and lung accounted for 24 deaths.

Cancer Mortality Rate (all forms) taken in triennial periods

The following table shows the cancer mortality rate since the year 1934. The rate is given as an average for triennial periods.

1934 - 36	1.4	1949 - 51	1.8
1937 - 39	1.4	1952 - 54	1.6
1940 - 42	1.4	1955 - 57	1.5
1943 - 45	1.6	1958 - 60	1.7
1946 - 48	1.6	1961	1.9

Infant Deaths (under 1 year of age)

	Males	Females	Total
Legitimate	6	9	15
Illegitimate	1	1	2
Totals	7	10	17

Infant Mortality Rate

Below is given a table of the Infant Mortality Rates from 1940 to 1961.

13.4 per 1,000 live births

21.4 per 1,000 live births - England and Wales

1940	1941	1942	1943	1944	1945	1946	1947	1948	1949	1950
40	43	50	28	34	36	34	43	27	29	29

1951	1952	1953	1954	1955	1956	1957	1958	1959	1960	1961
27	25	26	25	15	25	16	19	21	16	13

The Infant Mortality Rate is the lowest figure ever recorded. The corresponding rate for England and Wales is 21.4 and this also is the lowest figure ever recorded in the Country.

Causes of Infant Deaths Under 1 Year

Prematurity	-	7
Congenital Defects	-	4
Postmaturity	-	1
Infection (two cases of Meningitis)	-	2
Cerebral Anoxia (due to inhalation of liquor)	-	1
Internal Hydrocephalus	-	1
Gastro-enteritis	-	1

Infant Deaths (under 4 weeks of age)

	Males	Females	Total
Legitimate	5	7	12
Illegitimate	1	1	2
Totals	6	8	14

Neonatal Death Rate

11.0 per 1,000 live births

Still Births

	Males	Females	Total
Legitimate	14	11	25
Illegitimate	0	1	1
Totals	14	12	26

Still Birth Rate

20.1 per 1,000 (Live and Still) births

1951	1952	1953	1954	1955	1956	1957	1958	1959	1960	1961
30	27	11	28	20	10	14	26	18	18	20

Still Birth Rate England and Wales 18.7 per 1,000 births (live and still).

Increase of Live Births over Deaths

1940	1941	1942	1943	1944	1945	1946	1947	1948	1949	1950
198	170	294	340	381	243	360	342	306	265	227

1951	1952	1953	1954	1955	1956	1957	1958	1959	1960	1961
187	228	114	82	82	43	226	255	467	578	616

Death Rates relating to all forms of Tuberculosis

Rates per 1,000 population

Year	Estimated Population	Total No. of Notifications	Notification Rate	Total No. of Deaths	Death Rate

Food Poisoning	-	-	-	5	10	2	3	2
Erysipelas	12	13	7	6	6	2.3	2	-

During this year there was 863 notifications of infectious disease. This does not purport to be an absolute figure for notifiable infectious disease in the community, but it does, however, give a reasonable indication of their prevalence.

Dysentery

Nine cases of dysentery were notified. The table below shows the fluctuation which occurs from year to year.

1954	-	77 cases
1955	-	33 cases
1956	-	115 cases
1957	-	4 cases
1958	-	40 cases
1959	-	13 cases
1960	-	11 cases
1961	-	9 cases

Measles

A record number of cases occurred this year - 810 cases in all.

Tuberculosis

There were nine cases of pulmonary tuberculosis, and three of non-pulmonary tuberculosis.

The table below shows the total number of patients in Blaby R.D.C. on our Register. They are either under treatment or under supervision. The majority of patients with pulmonary tuberculosis are kept under observation for a considerable time depending on the extent of the disease.

Total Cases of Tuberculosis
remaining on our Register

Total on Register at 31st December 1961	Pulmonary		Other Forms of Tuberculosis	
	Male	Female	Male	Female
	114	79	16	14

Poliomyelitis

Two cases occurred during the year. One in a boy aged 3 years, and the other in an adult of 26 years of age. Both were the paralytic form of the disease although mild in character.

Diphtheria

No case occurred during the year.

Food Poisoning

Only two cases were notified.

VACCINATION AND IMMUNISATION

Immunisation against Diphtheria

Primary immunisations to infants and children total 1,286.
Booster immunisations to infants and children total 663.

Below is a table showing the figures for diphtheria immunisation since the year 1950. It can be seen that the figure for 1961 is the highest recorded.

	Primary Immunisation			Re-immunised
	Under 5 years	5-14 yrs.	Total	
1950	423	37	460	263
1951	461	11	472	403
1952	462	35	497	343
1953	364	21	385	370
1954	415	40	455	370
1955	408	25	433	377
1956	480	6	486	330
1957	401	20	421	264
1958	721	20	741	377
1959	584	40	624	319
1960	939	43	1,008	514
1961	1,197	89	1,286	663

B.C.G. Vaccination

Selected groups of school children were again given B.C.G. vaccination. In order to determine the children who required vaccination a preliminary tuberculin test was done.

The figures are tabulated below:-

Enderby Brockington School

Number of Pupils given Preliminary Skin Test	Number who were Positive	Number who were Negative	B.C.G. Given
121	12	107	107

National Assistance Act 1948

Section 47 - Removal to Suitable Premises of Persons in Need of Care and Attention

Under this Section the Medical Officer of Health, having obtained authority from the Council, can apply to a Court of Summary Jurisdiction for an Order for the removal to a suitable place of a person who is suffering from grave chronic disease, or being aged, infirm, or physically incapacitated, is living in insanitary conditions and is not receiving proper care and attention.

Investigations were made during the year into a number of cases, but no formal action was taken.

REPORT

of the

CHIEF PUBLIC HEALTH INSPECTOR

for the

YEAR

1961

BLABY RURAL DISTRICT COUNCIL

Public Health Department,
Council Offices,
Narborough.

To the Chairman and Members of
Blaby Rural District Council.

Mr. Chairman, Ladies and Gentlemen,

In conjunction with the report of the Medical Officer on the health of the District, I have pleasure in submitting my eighteenth Annual Report on the environmental circumstances of the District, and in particular in respect of the duties carried out by the Public Health Inspectors.

The Report which is mainly statistical in form shows, in general, the environmental circumstances to be good, and gives an indication of the progress that has been maintained during the year.

Two matters are worthy of special mention, the greater control over caravan sites under the Caravan Sites and Control of Development Act 1960, and the improvement of slaughterhouses for re-licensing under the Slaughterhouses Act.

Again I must express my thanks to Members of the Council for their interest and appreciation, and to other Officers for their support and co-operation.

I have the honour to be,

Your obedient Servant,

A handwritten signature in dark ink, appearing to read 'John J. ...', followed by a large, stylized 'X' mark.

Chief Public Health Inspector.

1. GENERAL STATISTICS

Area of District	32,583 acres
Number of Parishes	23
Estimated Population (mid 1961)	56,650
Number of Occupied Dwellings	20,699

2. WATER SUPPLY

Mains Water Supplies

There is piped water supply in all parishes in the District, taken to all sizeable groups of houses.

Following a link-up of the water main between Earl Shilton in the Hinckley Urban District and Elmeſthorpe, the six Southern parishes of Elmeſthorpe, Stoney Stanton, Sapcote, Sharnford, Aston Flamville and Wigston Parva were supplied with water from the Leicester Undertaking in 1961 and the former quarry source at Stoney Stanton abandoned.

During 1961, negotiations were in progress, between the Croft Granite Brick and Concrete Co. Ltd., the Leicester Corporation Water Department, and the Council to replace the quarry water supply to the parish of Croft by Leicester water, with the extension of the water main from Huncote.

Examination of Piped Water Supplies

RAW WATER				TREATED AFTER GOING INTO SUPPLY			
BACTERIOLOGICAL	CHEMICAL			BACTERIOLOGICAL	CHEMICAL		
SATIS-FACTORY	UNSATIS-FACTORY	SATIS-FACTORY	UNSATIS-FACTORY	SATIS-FACTORY	UNSATIS-FACTORY	SATIS-FACTORY	UNSATIS-FACTORY
1	12	-	1	15	1	-	1

In the parish of Thurlaston, nine premises comprising two farms, cottages and other premises rely on a private piped supply of water taken from Thurlaston Brook by means of a hydraulic ram and storage tank. This supply is bacteriologically unsatisfactory and the consumers have been advised to boil the water before use for drinking and dietetic purposes. The alternative possibilities of further treating the water, or the bringing in of a mains water supply to the various premises in the area are being investigated.

Well Water Supply

A few isolated farms and houses where piped water supply is not yet available still rely on wells for water supply.

Very rarely does water from wells in this District conform to the required bacteriological standard of purity, B. Coli being generally present in 100 mls.

Seven samples of water taken from shallow wells during the year were unsatisfactory. As a precautionary measure the occupants of the premises were advised to boil the water before use for drinking and dietetic purposes.

Water supply position throughout the District is shown by the following tables.

WATER SUPPLY FROM MAINS				WATER SUPPLY FROM WELLS	
No. of Houses		Estimated Population		No. of Houses	Estimated Population
20,582		56,371		117	279

TOTAL	20,699	56,650	20,582	20,504	78	117

3. SEWERAGE AND DRAINAGE

Every village in the District is provided with main sewerage, outfalling to properly constructed sewage disposal works.

There are, however, small isolated groups of houses particularly in the more rural parishes of Aston Flamville, Leicester Forest West and Stoney Stanton where it is economically impracticable to provide main drainage, and as yet, in the absence of the provision of small sewage plants, the drainage still has to be to cesspools.

A scheme has been approved to provide main drainage to a group of six houses in the parish of Potters Marston by connecting to the sewer in the neighbouring parish of Croft.

The sewage from the 19 sewered parishes is biologically treated at 12 sewage disposal works.

Rapid development and increase in population in several of the parishes in the District has necessitated schemes for enlargement and improvement of the works, and I am indebted to Mr. F.W. James, Engineer and Surveyor for the following details of schemes prepared and supervised by his Department.

<u>Braunstone</u>	Extensions to Sewage Disposal Works (Estimated Cost £84,500)	Work in progress
<u>Narborough</u>	Extensions to Sewage Disposal Works (Estimated Cost £49,500)	Work in progress
<u>Enderby</u>	Special Improvements (Estimated Cost £1,850)	Work in progress
<u>Stoney Stanton</u>	Special Improvements (Estimated Cost £1,200)	Work in progress
<u>Potters Marston</u>	Sewerage (Estimated Cost £1,400)	Tenders invited
<u>Blaby,</u> <u>Whetstone,</u> <u>and Enderby.</u>	Extensions to Sewage Disposal Works (Estimated Cost £79,000)	Approved in principle by Ministry
<u>Glenfields and</u> <u>Kirby Muxloe</u>	Extensions to Sewage Disposal Works (Estimated Cost £90,000)	Approved in principle by Ministry

Improvements to surface water drainage in Glenfields, at a cost of £20,000 were carried out during 1961.

During the year 4 cesspools and 2 private sewage treatment plants were constructed.

In connection with complaints received, re-drainage of premises and closet conversions, 159 obstructed drains were cleared, 30 drains smoke tested, 97 colour tested and 134 opened up for examination.

Pail Closet Conversions

The number of pail closets in the District is gradually being reduced, over 2,000 having been abolished since 1945, and only 254 now remain. Of these the majority are at premises where no main sewer is available and at houses scheduled for action under the Housing Act.

Approximately only 40 pails are still to be dealt with by conversion to water closets.

Under Section 47, Public Health Act 1936, the Council make a contribution of half the cost of conversion, and 2 statutory notices were served during the year, compulsory requiring conversions to be made.

There were 25 applications for contributions towards the cost of proposed conversions received from owners in 1961.

Number of pail closets abolished during the year -

Converted to water closets	47
Abolished by demolition or closing under Housing Act	<u>33</u>
Total	<u>80</u>

Pail closets throughout the District are emptied weekly by the Cleansing Department and contents disposed of mainly in an area at the refuse tip at Thurlaston, and occasionally by discharge into foul sewers at suitable manholes.

4. REFUSE COLLECTION AND DISPOSAL

The Cleansing Department which deals with the emptying of pail closets, cesspools and the collection and disposal of refuse is under the control of the Engineer and Surveyor.

The Council has undertaken to empty cesspools quarterly, and for this purpose and for the weekly emptying of pail closets a Karrier 800 gallon special wagon is used.

House refuse is collected weekly from every parish in the District using a fleet of ten Karrier Lorries, and disposed of by controlled tipping at the centrally situated tip at Thurlaston.

All vehicles are maintained and serviced at the Council's works and depot at Littlethorpe.

Litter bins are provided by the Council throughout the District, and a Commer Mechanical Sweeper is used for the regular sweeping of village streets.

5. INSPECTION OF PREMISES

The number of complaints received and recorded in the Register during the year was 311. Defects or nuisances totalling 1,030 were dealt with at 655 premises.

6. DISINFESTATION and DISINFECTION

Unclean or Verminous Premises

In connection with complaints received, 19 visits were made to unclean premises. Evidence of bug and flea infestation was found in two cases and disinfestation treatment was carried out in three premises.

Advice was given in 15 cases following complaints of infestation by ants and other insects.

Wasps' nests were destroyed at 8 premises, a charge of 7s.6d. being made for each treatment.

Terminal disinfection was carried out in 6 cases after Infectious Disease.

7. RODENT CONTROL

For the administration of the Prevention of Damage by Pests Act 1949, the Council maintains a Rodent Destruction Service, employing a Rodent Operator provided with a fully equipped light van.

Treatment for the destruction of rats and mice at private dwellings is carried out free of charge as a public service, but full charges are made for work on all other types of premises.

All premises and lands owned by the Council are regularly inspected and treated against rodent infestation.

Inspection of Premises

<u>Description of Premises</u>	<u>Total Visits</u>

Premises treated		13	143	0	15	171
Bodies Found		140	107	0	5	252

* An infestation estimated to exceed ten rats is classed as a Major Infestation.

Sewer Treatments

The foul sewers in the various parishes in the District are regularly test-baited, and treated where necessary for rodent destruction by baiting in the manholes.

8. SMOKE CONTROL

With one exception there was no evidence of excessive smoke emission from any of the chimney stacks from boiler plants in the District during the year.

The one exception was the chimney at Carlton Hayes Hospital, Narborough, where the replacement of the existing sprinkler-type stoking arrangement by an improved type of mechanical stoking is under consideration by the Hospital Board.

A newly installed incinerator at a factory in Braunstone caused a nuisance by the emission of smuts; after consultation with the manufacturers modifications were made and the plant has since functioned satisfactorily.

Prior Approval

Under the provisions of Section 10, Clean Air Act 1956 plans submitted under Building Byelaws must be rejected unless the height of the chimney is sufficient to prevent the smoke from becoming a nuisance, and under Section 3 of the Act notification must be given of intention to install any new furnace.

In submitting plans and specifications the owner may apply for Prior Approval, whereby the Council approve the proposed installation as complying with all requirements.

Four applications were received and given Prior Approval in 1961 -

1. Enderby House County Home,
Leicester Road, Narborough -
oil-fired boiler plant
2. Factory - K. Leigh (Stockings) Ltd.,
Wigston Street, Countesthorpe -
coal-fired boiler plant with under-feed stoker.
3. Blaby C. of E. School,
Queens Road, Blaby -
oil-fired boiler plant
4. Kirby Muxloe County School,
Barwell Road, Kirby Muxloe -
oil-fired boiler plant.

SMOKE CONTROL AREAS

In July 1961 the Council approved in principle the making of a Smoke Control Order under Section 11, The Clean Air Act 1956 in respect of part of Glen Parva parish, to include among other buildings all the houses on the Eyres Monsell Estate in the parish.

The proposal was approved in principle by the Minister on the 13th November, 1961, the Order subsequently made by the Council on the 2nd January, 1962, confirmed by the Minister on the 12th April, 1962, and the operative date fixed for 1st November, 1962.

Under the Blaby Rural District (Glen Parva) Smoke Control Order No. 1, the Smoke Control Area covers 175.6 acres and includes

1,634 Domestic buildings
2 Commercial buildings
2 Schools.

On and after 1st November, 1962, only authorised fuels, i.e. specified fuels capable of being burnt without creating smoke may be used in the buildings in the area.

Although the average person feels that industrial smoke is the principal cause of air pollution, the fact is that domestic smoke accounts for roughly two thirds of the air pollution throughout the country.

In a residential area, chimneys from houses and bungalows discharge their smoke at low roof level, resulting in local air pollution and soot deposit.

One has only to rub over a window cill or an outdoor clothes line in such residential area at any time during the winter months to realise the filthy state of the air caused by the smoke from domestic chimneys.

INSPECTION OF FOOD SUPPLY

9. MILK SUPPLY

Dairies and Distribution

The Blaby Rural District is a specified Area wherein only Designated Milks such as Tuberculin Tested (raw milk), Pasteurised and Sterilised (heat treated) bottled milk may be retailed.

Although, there are 134 dairy farms in the District only 6 Producers retail their milk; the bulk of the milk is sent to large dairies in Leicester and adjoining towns where it is heat treated.

The bulk of the retail milk supply in the District is now distributed by these large dairy firms.

The number of Distributors on the Register at the end of the year was:-

Producer-Retailers (milk produced in District)	6
Distributors (from premises in District)	8
Distributors (from premises outside District)	14
Total	<u>28</u>

Satisfactory conditions were maintained in the 3 registered dairies in the District to which 24 visits were made.

Milk Samples

Samples of milk are regularly taken from milk supplies in the District and submitted to the Public Health Laboratory for bacteriological examination.

Bacteriological Examination of Milk Samples

		Samples Taken	Satisfactory	Not Satisfactory
Designated	(Tuberculin Tested	6	6	0
	(Pasteurised	18	18	0
TOTALS		24	24	0

Biological Examination of Milk Samples

Samples of milk are regularly taken from milk supplies, both produced and retailed in the District, and submitted to the Public Health Laboratory for biological examination, to determine if any of the supplies are infected with M.Tuberculosis or Brucella Abortus.

Ten samples were taken during the year and all found to be free from infection.

10 ICECREAM

No icecream is manufactured in the District, but 124 premises are registered for the sale of pre-packed icecream.

Samples of icecream are taken when available throughout the year, but principally during the Summer months, and submitted to the Public Health Laboratory for bacteriological examination.

Samples

Samples Taken	Satisfactory		Unsatisfactory	
	Grade 1	Grade 2	Grade 3	Grade 4
64	60	4	0	0

In addition 9 samples of Ice-Lollies were taken for examination - these were Satisfactory.

11. MEAT INSPECTION

For the purpose of meat inspection 1,397 visits were made during 1961 to the 10 private slaughterhouses licensed in the District up to the end of the year, wherein 11,464 animals were slaughtered and inspected.

Slaughterhouses and Slaughtering

Under the provisions of the Slaughterhouses Act 1958, and the Slaughterhouses Reports (Appointed Day) Order 1959, the "Appointed Day" for the Blaby Rural District was confirmed to be 1st January, 1962.

By that date only the 5 slaughterhouses which had been brought up to standard to comply with the requirements of the Slaughterhouses (Hygiene) Regulations 1958 and the Slaughter of Animals (Prevention of Cruelty) Regulations were re-licensed, and slaughtering ceased in the other five slaughterhouses.

Subsequently agreed improvements to 3 of the remaining slaughterhouses were completed early in 1962, and licences were issued bringing the total number of licensed slaughterhouses in the District to eight.

The eight licensed slaughterhouses are situated at -
Croft, Enderby, Littlethorpe, Narborough, Sharnford,
Stoney Stanton (2) and Whetstone.

The private slaughterhouse at Whetstone is a newly built abattoir designed for a fairly high through-put for wholesale meat trade, approximately 52% of the out-put being exported from the District.

Meat inspection at the eight slaughterhouses in various parts of the District makes much demand on the Public Health Inspectors, involving considerable mileage in travelling and overtime outside normal working hours.

Slaughter of Animals Act

Under the provisions of this Act, 28 licences have been issued to slaughtermen for the slaughtering of animals.

12. OTHER FOODS INSPECTION

The Public Health Inspectors are often called upon to give an opinion on the fitness of foodstuffs for human consumption.

When an article of food is found to be unfit, it is condemned and generally voluntarily surrendered for destruction.

Foods Condemned and Surrendered

		Weight (approx.)
16 tins	Canned Meat	58 lbs.
63 "	" " Vegetables	66 "

Whisky	6
<u>Drugs and Medicines</u>	
Cough Tablets	1
Feverish Cold Mixture	1
Glucose Plus Tablets	1
Honey, Glycerin and Blackcurrant Mixture	1
Tooth Essence	1
TOTAL	136

The only unsatisfactory sample was of pork sausages which contained a total of 71% of meat, made up of 29% lean meat and 42% fat. The analyst considered the proportion of lean meat to be too small. The facts were brought to the notice of the manufacturers and subsequent samples were satisfactory. There is no statutory standard for sausages at present.

13. FOOD PREMISES

Due to good co-operation between the Public Health Inspectors and food traders little difficulty has been experienced in administering the provisions of the Food Hygiene Regulations.

Inspection of Food Premises

	<u>Visits</u>	<u>Notices Issued</u>	<u>Notices Complied</u>

	545	137	91

14. HOUSING

Much of the following information relating to new houses and rehousing into Council houses has been obtained from other Departments of the Council.

HOUSES IN DISTRICT (corrected to 31.3.62)

Total Number of Occupied Houses	20,699
Total Number of Council Houses	1,933
Number of Leicester Corporation Houses	1,623

NEW HOUSES

	Council	Private Enterprise	Leicester Corporation (in District)	Total
Houses completed during year	68	827	53	948
Houses in course of erection at end of year	117	478	0	595
Number of Post-War Houses completed	1391 *	5403	1623	8417

* Excluding 100 Temporary Prefabricated Bungalows.

COUNCIL HOUSE APPLICATIONS

Number of Applicants on List at end of year	242
Additional number on Slum Clearance List	184
Number of New Applications during year	131

INSPECTION OF HOUSES during year

Houses inspected for housing defects	383
Inspections made for such purpose	736
Houses inspected and recorded under Housing Consolidated Regulations	146
Houses found to be unfit for habitation	94

CLEARANCE AREAS

Official Representation was made in 1961 in respect of one Clearance Area and the Clearance Order subsequently confirmed by the Minister.

Clearance Area No. 15

The Nook/Townsend Road, Enderby - 15 houses

During the year, 12 houses were demolished in Clearance Areas, and 18 families comprising 48 persons were rehoused from houses in Clearance Areas.

INDIVIDUAL UNFIT HOUSES

Reports were made in respect of 20 unfit houses and subsequent action taken under the provisions of Section 16, Housing Act 1957 during the year, resulting in -

15 Demolition Orders

and

4 Closing Orders

being made, and 1 Undertaking accepted.

	Houses	Families Re-housed during year	Persons Displaced during year
Demolished during year	19	18	37
Closed during year	13	13	35

REPAIR OF HOUSES

Informal Action

Unfit or defective houses rendered fit as result of informal action. 99

Statutory Action

1) Public Health Acts

Houses in which defects were remedied after service of formal notices 6

2) Housing Act

Houses made fit after service of formal notices (Sections 9 - 16 H.A. 1957) 1

RECONDITIONING OF HOUSES

Housing Act 1949 -

Improvement (Discretionary) Grant Scheme

Applications for Grants received during year	
from Owner/occupiers	36
Owners of tenanted houses	19
Total	55
Number of applications approved	53
Number of applications refused	2

Number of houses reconditioned during year with Discretionary Improvement Grants - 27.

House Purchase and Housing Act 1959 -
Standard Grant Scheme

This Act requires the Council to make a 'Standard Grant' to an owner for the provision of certain amenities in a house - namely

1. fixed bath or shower in a bathroom	(max. grant £25)
2. wash hand basin	(" " £5)
3. hot water supply	(" " £75)
4. water closet in or contiguous to a dwelling	(" " £40)
5. satisfactory facilities for storing food	(" " £10)

Such Grant to be one half cost of the work, but not to exceed £155, subject to the house being in good state of repair and otherwise fit in all respects for habitation.

Applications for Standard Grants received:-

from Owner/Occupiers	52
from Owners of tenanted houses	2

Number of houses improved during the year with Standard Grants - 35.

RENT ACT 1957

As in the past few years very few applications were received during the year from tenants for Certificates of Disrepair under the Act.

Number of Applications from Tenants for Certificates of Disrepair	2
Number of Undertakings from Landlords to carry out repairs	0
Number of Certificates of Disrepair issued	2
Number of Certificates of Disrepair cancelled	0

SLUM CLEARANCE

In 1955, the Council submitted to the Minister of Housing and Local Government a Slum Clearance Programme wherein it was planned to deal with approximately 350 unfit houses in the District over a period of 5 to 8 years, and from the following table it will be seen that the programme is being carried out.

HOUSES REPRESENTED				HOUSES DEMOLISHED		CLOSED	
YEAR	CLEAR- ANCE AREAS	INDIVI- DUAL UNFIT	TOTAL	CLEAR- ANCE AREAS	INDIVI- DUAL UNFIT	INDIVI- DUAL UNFIT	TOTAL
1955	24	21	45	0	4	21	25
1956	26	28	54	9	17	19	45
1957	9	25	34	8	17	15	40
1958	0	43	43	29	23	15	67
1959	27	61	88	13	9	23	45
1960	26	34	60	0	60	6	66
1961	15	20	35	12	19	13	44
TOTAL	127	232	359	71	149	112	332

Due to factors outside the control of the Council difficulties have been experienced in erecting and completing Council Houses in certain parishes in the District, with the result that although the rate of slum clearance for the District has proceeded according to the programme, nevertheless in some parishes there are groups of unfit houses still to be dealt with.

15. CARAVAN DWELLINGS

Under the Caravan Sites and Control of Development Act 1960 the Council issued 44 caravan site licences.

Such licences were issued after approval under Planning had been given in respect of each of the sites and suitable conditions imposed dependant upon the number of caravans to be stationed on each site, and whether the planning approval was permanent, for a temporary period only, or for a limited period under Section 20 of the Caravan Sites and Control of Development Act, after which time the caravans must be removed.

Licences issued -

14 Permanent	licences	~	single caravan site
1 "	licence	~	16 caravans site
14 Temporary	Licences	~	single caravan site
1 "	licence	~	13 caravans site
3 "	licences	~	2 caravan sites
11 Run-down	"	(Sec. 20)	

By the end of the year, the caravans had been removed from 3 permanent single sites, from 7 temporary sites, and from 2 "Run-down" sites.

As the site licence conditions had not been complied with at the one permanently licensed site for 16 caravans, authority was given for legal proceedings to be instituted against the site owner. The site was however cleared early in 1962 without recourse to Court procedure.

Court action was taken against one site owner, a conviction was obtained, and the caravan removed.

Council Caravan Site

The Council has commenced a caravan site at Countesthorpe on the site of the 10 pre-fabricated temporary bungalows.

Upon the re-housing of the occupants in a permanent Council house, each pre-fab is being demolished and the site adapted for the standing of a single caravan.

Each site is provided with separate water closet, drainage, water and electricity supply.

Many of the occupants of caravans already stationed in the District on sites with Temporary and "Run-down" licences have applied for one of these Council sites, and it is unfortunate that the number available is inadequate to meet the demand.

16. SHOPS ACT

As the majority of the shops in the District are food shops, regular inspections are made in connection with the administration of food hygiene regulations, but 10 visits were made to other shops for the purpose of administration of Section 38, Shops Act 1950.

This section applies to shops where assistants are employed and relates specifically to sanitary accommodation, temperature, washing facilities, lighting and facilities for taking meals.

Conditions in the shops were found to be satisfactory and no action was required under the Act.

17. MISCELLANEOUS REGISTERED and OTHER PREMISES IN DISTRICT

Offensive Trades	-	None
Knackers Yards	-	"
Common Lodging Houses	-	"
Swimming Pools	-	"
Canal Boats	-	"
Pet Animals Act (Premises)	-	1
Rag Block and Other Materials Act (Premises)	-	1
Cinemas	-	2

18. PETROLEUM INSTALLATIONS

All places where petroleum spirit and inflammable petroleum-based mixtures are stored are controlled by the Council by the issue of annual licences under the Petroleum Act and Regulations.

The recommendations set out by the Home Office in the Model Code of Principles of Construction and Licensing Conditions have been applied to all licensed petroleum stores in the District.

Seventy licences were issued in respect of installations at 28 petrol filling stations, and storage of petroleum at 42 other premises.

Six new underground petrol storage tanks were installed and pressure tested during the year.

19. FACTORIES

The basic industry in a rural district must obviously be agriculture, and there are 197 farms in the District, together with several smallholdings specialising in market gardening and flower-growing.

Granite is quarried in two parishes and sand is dug in others, and the ready availability of these two materials has enabled several firms to specialise in concrete products, particularly concrete pipe manufacture and artificial stone.

Hosiery, knitwear and boot and shoe manufacture have been established in some of the villages for many years, but with the growth and development of the district other industries, particularly light engineering have now become firmly established.

The disposition of industry in the various parishes in the District is shown on the following table.

PARISH	Hosiery	Knitwear	Dyeing	Boots and Shoes	Leather Products	Toe Puffs	Buttons	Bedding and Upholstery	Wall Paper	Boxes	Photographic Equipment	Electrical Components	Engineering	Motor Vehicle Repair	Sawmilling	Woodworking	Coach Building	Boat Building	Fire Lighters	Concrete Products	Brick Making	Tar Macadam	Plastic Tubing	Metal Sorting	Celluloid Sorting	Sand Quarrying	Stone Quarrying	Bakehouse	Slaughter-house	Food Manufacture	Laundry	TOTAL
